As a designer and usability expert I take every project seriously, no matter the size. I treat every client as if they were number one and believe building relationships is equally as important as creating beautiful user-centered designs.

EDUCATION

Academy of Art San Francisco
Web Design + New Media (B.F.A.)
Graduated 2015

A list of classes available upon request

My B.F.A. in Web Design + New Media focused on web design, information architecture, user experience design, usability testing, general design thinking, and HTML/CSS/PHP. Additionally, it included graphic design, font design, motion graphics, digital imaging, photography, screen printing, and art history.

PROFESSIONAL EXPERIENCE

Cal Poly Humboldt
Marketing & Communications
Web Designer
July 2015 – Present

Professional references available upon request

During my 7 years as a web designer for Cal Poly Humboldt's Marketing team (previously Humboldt State University) my core role has been to plan, design, manage, and launch medium to large Drupal websites. During the course of each project I may run discovery meetings, organize research tasks, do research, conceptualize with wireframes, create content inventories, build information architecture, organize complex sitemaps, design interactive Figma prototypes, assign tasks to clients and editorial, collaborate with the campus photographer, and copyedit text to make it more user friendly.

Secondarily, I conceptualize marketing emails and build them in MJML, offer ongoing technical maintenance and support to our clients, contribute code to our Drupal distribution (D7), build custom features (D7), complete complex site redesigns, and organize in person or zoom training sessions.

I have excellent attention to detail and love to organize. I also find passion in doing things the right way even if it's the hard way.

Below you will find a general list of skills and expertise that expand on the above professional experience. This list is based on how I approach projects and some of the items overlap into multiple categories.

Thank you for reading!

SKILLS & EXPERTISE

INFO ARCHITECTURE

Content Strategy
Content Inventories
Sitemap Building
Analytics Analysis
Micro Copy

USER EXPERIENCE

Wireframing
Prototyping
Concept Sketching
Usability Testing
Figma (6 yrs)
